Zagan V. I. Hydraulic hydroacoustic radiator	505
Zinov'ev O. I., Kozlenko J. M., Kuranov K. V., Pulatova L. F., Tunin M. S. Acoustic spectroscopy for study of kinetics of ultrahigh speed reactions of proton transference in aqueous solutions of glycine	510
Ivina N. F., Kasatkin B. A. Numerical analysis of dispersion relations for piezoactive waveguide normal waves	516
Kuznetsov V. P. On low frequency sound attenuation in turbulent medium	521
Lapin A. D. Effect of solid body surface corrugation shape on transformation of volume waves into surface Rayleigh wave	523
Mironov M. A. Impedance of orifice in a baffle, separating moving medium from medium at rest	528
Plaksin S. I. Generation of ultrasonic waves by axiallysymmetric transducer in cavitation regime	535
Polunin V. M. On certain features of magnetic liquid transducer	541
Sazonov I. A. Waveguide vibroinsulator for flexural waves of arbitrary polarization	547
Fridman V. E. Selfrefraction of weak shock waves	551

Notes

Ignateva E. A., Konovalova L. P., Litvinenko A. A. Dispersive layered waveguides with wide-band transducers	560
Kanaev B. A., Tartakovskii B. D. On vibration damping of structures without isolation	561
Makartchenko N. N., Rozhin F. V., Tonakanov O. S. Focusing of sound by absorbing liquid sphere	564

Meetings and conferences

Scientific session of the united scientific council of the Academy of Sciences of the USSR on complex problem «Physical and technical acoustics» and scientific council of the Academy of Sciences of the USSR on the problem «Ultrasound»	566
--	-----

News and Views

Vlasov E. V., Munin A. G. The 7th scientific technical conference on aviation acoustics	572
Sarvazyan A. P. International conference «Ultrasound—81»	573

Поправка

В статье Петухова Ю. В. «Поле давления и скорости, создаваемое расширяющейся сферой» (Акуст. ж., 1982, т. 28, № 1, с. 102–105) правильными следует считать значения: $A = \rho_0 c_0^2 / n$, $P = \rho n / \rho_0 c_0^2$.
